

NLP WIZARDRY - SECRETS REVEALED

by Terrick Romer

In this short report, I'm going to share with you some information about NLP that will have a positive impact on your life – no matter where or what you may be experiencing now.

I will also be introducing you to some of the most exciting NLP techniques that you can test out and get a feel for why so many people have had life changing experiences in a matter of minutes.

To sum it up, my goal for this report is for you to not only gain a better understanding of why NLP is the ultimate set of techniques for instant change, but you'll get to experience a shift and move past a challenge that once held you back.

THE MAN BEHIND NLP WIZARDRY

Before I get into the details of [NLP Wizardry](#), let's talk very briefly about the guy behind it – Jevon Dangeli

I am going to discuss how Jevon impacted my life and how he is making an impact in the lives of people all around the world.

Not only is Jevon (what I believe to be) the best NLP trainer in the world, he is also the creator of multiple life changing programs. One of my favourites is : <http://jevondangeli.com/cool-calm-collected/>

NLP Wizardry was life changing for me and whatever deeper reason you have for doing what you do; NLP Wizardry will help you achieve it easier and with lightning speed.

HOW NLP WIZARDRY CHANGED MY LIFE

Let me take you back to a time when I was so broke, even just trying to get by on a day to day basis was a constant struggle. I was sick and tired of being sick and tired. I had a dream about being the kind of person that makes his mark on this planet, and as Steve Jobs said "leave a dent in the universe".

The problem with this dream was -There was a major challenge standing in my way. The crazy part was, I had built and run two large companies in the past and had the skill set needed to turn my dream into a reality, but no matter how much I tried, I

was stuck with an inability to take the necessary action. That feeling of taking 2 steps forward and 10 steps back was a constant struggle.

I was worried all the time, lying awake at night knowing I was not doing what I wanted to do and not knowing how to break free from whatever was holding me back.

THE DAY EVERYTHING CHANGED

Something totally unexpected happened... I received a call from Jevon. I had met Jevon several years prior when I was running one of my successful companies. (I should have hired him then and there as my personal coach) but we all know that saying, hindsight is 20/20 vision.

Thinking back to the day I received that call and what has happened to my life since then would literally be described as a 180 degree turnaround. My consulting company now has clients from all over the world and I am making that "dent".

That phone conversation with Jevon was the first time I opened up and got really honest about where I was. I was desperately seeking a change (needing it to happen and happen fast).

What happened during that call could only be described as a massive weight off my shoulders. Jevon also mentioned to me that he would be back in South Africa to present his NLP training. I knew then and there that this is what I was waiting for, this is what I needed.

I knew this was not only how I could release the breaks on all the stuff that was holding me back but also the way for me to live my dreams rather than watching others live out theirs.

But then a shock of reality hit home, I knew that the cost of accredited NLP Practitioner training is normally well over twenty thousand Rand. And at that time in my life it might as well have been a million Rand. Either way I didn't have it. Heck, I couldn't even afford the plane ticket to Cape Town where the live part of Jevon's course was being held over a seven day period.

So I left that call feeling completely overwhelmed, the reality of my situation was telling me that it was impossible to attend but in my gut I knew with absolute certainty that attending Jevon's NLP training was the key to opening that locked door.

But Jevon, being the person he is, followed up with a simple yet profound message, "if you really want this... the doors will be opened for you to make it possible".

I sat with that thought for several days, often with moments of cold sweats. Then something shifted, instead of facing my current reality I started asking a different question: "How could I make this possible right now?"

THE START OF A NEW LIFE

I remember that Sunday, the day the live training with Jevon started. It was a beautiful day in Cape Town and there was what I can only describe as excited anticipation in the air.

The next seven days were like taking the most incredible roller coaster ride filled with all kinds of emotions and life changing revelations.

Each day passed in the blink of an eye leaving myself and the other attendees wanting more.

Trying to describe what happened during that time in Cape Town would not do it justice because some things in life have to be experienced, and this is one of those things.

Within 3 months after attending Jevon's NLP training, I went from being totally broke and uncertain of how to create the life I was desperately seeking, to taking on clients from all over the world.

I released the breaks that were holding me back and took flight.

So what was it that really shifted and transformed?

The decision to invest in myself even when I did not have the money to invest in myself. But even more important than that, I got really honest about where I was in life, and opened myself up to experience the shift that took place over those seven profound days in Cape Town.

It worked for me and it can work for you.

THE UNDERLYING PRINCIPALS OF NLP

Let's touch on some of the important principals of NLP and what you need to know so that you can try out a few of the techniques and get a real feel and experience NLP first hand.

Neuro-Linguistic Programming (NLP) explains how we take information from the outside world into our neurology and how that in turn affects our thoughts, feelings and behaviours. Therefore, the reality that we experience is largely determined by what we do inside our heads. NLP approaches enables people to 'run their own minds'. More fulfillment in life is achievable when we are less affected by external circumstances, through gaining control of our internal processes. This leads to mental freedom, empowered responses, and mindful interactions with others.

When I was in my early twenties I started a 7 figure company that allowed me to enjoy some of the finer things in life. The problem was, no matter how much I had – I still felt empty. Like filling a leaking bucket with water, it would always needs more and it felt like being stuck in a hamster wheel spinning round and around but getting nowhere. Now, maybe this has not been your experience, but maybe you can relate to that feeling of wanting a change in your life.

What I came to realise during the live training with Jevon, is that I had built up a completely negative belief around earning money because in the past it did not fill that leaking bucket. I realised that this limiting belief was stopping me from taking any action that would allow monetary gain.

One NLP technique changed my reality and can change yours too!

If you have ever experienced that feeling where one part of you wants to take a certain action and another part wants something different, **NLP Parts Integration will be immensely useful to you.**

Emotional experiences throughout life, and especially during the early imprint years can result in the creation of Parts at the unconscious mind. These Parts generate their own values and beliefs, and are responsible for certain behaviours. Overwhelming feelings and reactions, as well as out of control behaviours are the result of 'Conflicting Parts'.

The technique creates harmony between Parts of the unconscious mind, so that their values are in alignment. A person with 'Integrated Parts' is more congruent, empowered and clear in their decisions and actions.

By the way, did you know that it's your unconscious mind that's responsible for all your thoughts, feelings and behaviours? NLP facilitates change at the unconscious level. This inside-out approach to change is what makes results both rapid and sustainable.

To really get a hands on experience of this and how to use this technique I can only encourage you to get hold of the Free NLP Training videos that Jevon provides. You can get access to them here: <http://nlpwizardry.com/>

Another powerful NLP technique is the NLP Fast Phobia Cure.

This is one of the most well known NLP techniques, largely thanks to Tony Robbins when he performed a live demonstration on the Oprah Winfrey show and took a lady that had an incredible phobia of snakes to petting a live snake in a matter of minutes. This technique works wonders for any kind of irrational fear. It also helps to eliminate the effects of traumatic memories.

The NLP Fast Phobia Cure enables people who suffer from phobias or traumatic memories to reprogram their brain's response to the original experience.

The process includes facilitating a safe and relaxed state, establishing a dissociated perspective, and then guiding the traumatised person to reprocess the traumatic memory so that they are able to update the meaning that their unconscious mind equates with that experience in present time. The reprogramming effect of this technique integrates new perspectives that result in the individual's nervous system no longer triggering the unnecessary activation of the 'fight or flight' reaction.

Jevon explains this much better than I can, so read more about the complete instructions here: <http://jevondangeli.com/how-to-get-rid-of-phobias-and-trauma-using-nlp/>

NLP also teaches many healing techniques including - How to Change Your Personal History

Did you know that about 95% of your thoughts and behaviours are based on beliefs that have been programmed into your mind by other people?

First of all, realize that it's only the way that you think about a situation that makes it a problem, hence the situation itself or others involved (even if it happened a long time ago) are not the cause of your mental/emotional state – only your current thoughts are.

The good news is that you can update the beliefs that have a negative effect on your health, relationships, finances and life.

With an understanding of [NLP](#), the idea that “it's never too late to have a happy childhood” becomes real. No matter what you experienced in your past, you have the ability to change your perceptions and beliefs regarding the past so that you can feel better about it right now.

There is more to us as humans than merely the sum of our past experiences. How we usually react to situations is largely determined by our past conditioning, however, we can choose how we want to feel and how to respond differently than our past habitual tendencies.

You can change your personal history by taking your current level of awareness (and life experience) and integrating it at those times of your life when you were less resourceful and being negatively influenced. You can easily imagine doing this and in so doing you'll be re-coding the meaning which you give those past events. When negative past experiences take on a new resourceful meaning in your life, then your beliefs change and you become a more whole YOU.

Here is a great article that gives way more info: <http://jevondangeli.com/how-to-change-your-personal-history/>

The three NLP techniques that I've introduced you to above are just a taste of the many empowering techniques that Jevon teaches at his NLP Practitioner Training. This ground-breaking course also provides much more than just techniques. It's as much about personal development as it is about providing you with the skills and resources to master intrinsic coaching process and multi-level communication.

Bridging that gap between knowledge and Action

If you're thinking to yourself that:

- “Maybe there is a faster way to get life changing results, using NLP”
- “Maybe there is a better way to take the actions you desire”
- “Maybe NLP training is more than learning a set of techniques and is really a life healing and empowering experience”

If you said “maybe”, you might be wondering about bridging that gap between these new ideas, information and what you really want.

Here's the truth, knowledge is **not** power. It is only potential power and the reality is that most people never take action on the knowledge they gain. NLP removes that inability to take action and places you back in the driver seat.

So you need a way to remove those sometimes hidden blockages that stop you from taking your life to where you want it to be, and I'm going to talk to you about that in a moment.

But first a question, if you have ever thought about making a change...

- How would you like that to happen in lightning speed?
- How would you like to release the breaks and reach those dreams?
- How would you like to release that excess baggage that weighs you down?

Now maybe you have considered NLP as a method of coaching and a dynamic way to help others or maybe you want to just experience the transformative power of NLP in your own life. You can get all of this and more with Jevon.

I'm sure you have read a good few self help books and may have even attended a few seminars, however I guarantee you have never experienced anything that will come close to Jevon's NLP training. He's a trainer like no other and his understanding of this subject and how to help people achieve their unique desires is incredible.

Jevon's NLP Practitioner Training provides you with Self empowerment, Self motivation, Self leadership and enhanced performance in all the areas of your life where you desire this. It also teaches you core coaching skills from A-Z so that you can (if you wish) make an amazing contribution to the life of others. It provides internationally recognised certification in NLP and coaching.

NLP is widely known as "the fastest and most powerful vehicle for personal change in existence!" (Psychology Today magazine). It enables you to Enjoy far greater control and freedom over your own state of mind, responses, and interactions with others. You'll find it much easier to clarify your dreams for the future and identify barriers that may be holding you back. Change the unwanted habits and behaviours that are standing in your way. Understand your partner's and children's needs and communication styles more fully. Enhance rapport and communication with others. Recognize how others are using language to influence you. You'll find it easier to achieve your personal and professional goals, because you'll gain greater access to your internal resources.

When you register for this training you will be provided with Jevon's book: [NLP For Wizardry - The User Manual For Your Mind](#) (the full NLP Practitioner and HNLP Coach manual), plus professionally edited live training videos from the course.

Here what's inside the book: <http://jevondangeli.com/nlp-for-wizardry-the-user-manual-for-your-mind/>

Watching the training videos in advance and completing each video's review will assist you in developing a familiarity with the information and the skills to maximise your learning and enjoyment during the live 7 day training. By the time you attend the live event, your pre-course preparation will enable you to be more "hands on" and poised to benefit from the accelerated learning processes. The training videos and other learning tools that you are provided with serve as your pre- and post reference for the course to further integrate your skills and understanding.

What are the benefits of this training?

"I am in awe of Jevon's expertise and teaching skill. I loved the material and feel incredibly connected to the other students. Truly a life-changing experience!" -Cat MacLaggan, Mum, Canada-

Whether you are new to NLP or you are already a NLP Practitioner or Master Practitioner or Coach, you'll benefit from the strong emphasis on how to conversationally coach the unconscious mind.

Neuro-science has long known that our unconscious functioning precedes conscious awareness by a 1/2 second. This means that most if not all issues like motivation, procrastination, indecision, conflicting priorities, burnout, overwhelm, performance anxiety and fear are a result of automatic (unconscious) reactions and patterns which occur before conscious awareness. Amazingly, though, most coaching and therapy programs available today rely heavily on conscious processing through questioning, analysis, and tasking. It's like trying to steer a train by asking someone in the last car to change the direction of the entire train. It simply won't work.

This training will teach you how to work with unconscious processes that are at the root of most coaching issues, yet do it in a natural, conversational way that makes this approach adaptable to any context.
